

## Stromal fibroblasts present in breast carcinomas promote tumor growth and angiogenesis through adrenomedullin secretion

### SUPPLEMENTARY FIGURE

**Supplementary Figure 1: Expression of AM and SDF1 mRNAs in CAFs and NHDFs.** Expression of AM and SDF1 mRNAs in NHDFs and CAFs. Total RNA (1  $\mu$ g, DNA-free) prepared from NHDFs (n = 3) and CAFs (n = 9) was transcribed into cDNA and subjected to real-time quantitative reverse transcriptase-polymerase chain reaction for the estimation of the relative ratios of AM and SDF1 mRNAs to glyceraldehyde-3-phosphate dehydrogenase (GAPDH) mRNA. Each bar depicts the mean  $\pm$  standard error of the mean of the two independent experiments from two independent preparations of total RNA from NHDFs and CAFs.
