HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

In the article titled “Antibacterial Activity of Chalcone and Dihydrochalcone Compounds from *Uvaria chamae* Roots against Multidrug-Resistant Bacteria” [1], minor errors were found which happened during the production process. The following corrections should be applied to the article:

- (i) The name of the same compound is written in different ways throughout the text, i.e., isouvaretin, iso-Uvaretin, Isouvaretin, isoUvaretin, and Iso-uvaretin, as well as iso-Chamanetin, Iso-Chamanetin, and Iso-chamanetin. These formats should be standardized to Iso-uvaretin and Iso-chamanetin.
- (ii) In the description of Table 1, $p < 0, 05$ should be corrected into $p < 0.05$.
- (iii) In Figure 1, BIP on the vertical axis should be corrected to BPI.
- (iv) The sentence “Antimicrobial activity of dihydrochalcones from *Populus balsamifera* tree buds was also reported before [35]” should be corrected to “Antimicrobial activity of dihydrochalcones from *Populus balsamifera* tree buds was also reported before [35].”
- (v) In the Conclusion, the last sentence should be updated from “Finally, further chemical description and antimicrobial activity measurements of each

individual detected compounds are important perspectives that should be addressed in the future” to “Finally, further chemical description and antimicrobial activity measurements of each individual detected compound are important perspectives that should be addressed in the future.”
