Submitted on 15 Oct 2022

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Co-funded by the
Erasmus+ Programme
of the European Union

THE REGULATION OF ARTIFICIAL INTELLIGENCE BY THE EUROPEAN ORGANIZATIONS AND THE EMERGENCE OF NEW FUNDAMENTAL RIGHTS IN THE DIGITAL DOMAIN

Raphaël Déchaux

Lecturer in Public law

The image features a central graphic of a human brain shape, but instead of organic matter, it is filled with intricate, glowing golden-brown circuit traces and small, bright white circular nodes. This brain-like structure is positioned above a blurred, perspective view of a physical printed circuit board (PCB) with various components and traces. The overall aesthetic is futuristic and technological, with a soft, hazy background.

What is Artificial Intelligence (AI) ?

What is AI ?

**EXPERT SYSTEMS OR
*SYMBOLIC ALGORITHMS***

**MACHINE LEARNING OR
CONNECTIONIST ALGORITHMS
*(DEEP LEARNING)***

What is AI ?

Automated decision-making > human decision-making

- Big Data
- No emotion bias

**INTRODUCTION:
THE NEED FOR INTERNATIONAL
LEGAL REGULATION**

**A) THE NEED FOR A
CLASSICAL LEGAL
REGULATION**

1) The rise of "ethical" texts

What is ethic?

1) The rise of "ethical" texts

What is ethic?

- system of values
- non-prescriptive (moral and law)

1) The rise of "ethical" texts

<https://lestempselectriques.net/index.php/2020/05/06/ia-algorithmes-big-data-data-science-inventaire-des-cadres-ethiques-et-politiques/>

2) The inadequacy of ethical instruments

2) The inadequacy of ethical instruments

2) The inadequacy of ethical instruments

2) The inadequacy of ethical instruments

|---|---|
|  |  |
| VERNON PRATER | BRISHA BORDEN |
| LOW RISK 3 | HIGH RISK 8 |

| | |
|---|--|
|  |  |
| DYLAN FUGETT | BERNARD PARKER |
| Prior Offense 1 attempted burglary | Prior Offense 1 resisting arrest without violence |
| Subsequent Offenses 3 drug possessions | Subsequent Offenses None |
| LOW RISK 3 | HIGH RISK 10 |

| | |
|--|--|
|  |  |
| VERNON PRATER | BRISHA BORDEN |
| Prior Offenses 2 armed robberies, 1 attempted armed robbery | Prior Offenses 4 juvenile misdemeanors |
| Subsequent Offenses 1 grand theft | Subsequent Offenses None |
| LOW RISK 3 | HIGH RISK 8 |

**B) THE NEED FOR
INTERNATIONAL LEGAL
REGULATION**

B) The need for international legal regulation

Why should international regulation be "better" or "more effective" than national regulation?

B) The need for international legal regulation

Why should international regulation be "better" or "more effective" than national regulation?

- globalization of the digital economy
- context of international competition

C) A EUROPEAN REGULATION

C) A European regulation

- 50 for the Council of Europe
- 71 for the European Union
- 10 for OECD
- Only 9 for UN.
 - UNESCO released a *Recommendation on the Ethics of Artificial Intelligence* on 24 November 2021.
- OECD : first organization to adopt a *Recommendation on Artificial Intelligence* on 22 May 2019.
 - OECD AI Policy Observatory

PART 1:
**THE EMERGENCE OF AN
INTERNATIONAL REGULATION OF AI**

A) THE CURRENT SOFT LAW INSTRUMENTS

Hard law or soft law ?

1) In the Council of Europe

**Convention 108
on data protection**

**1) In the Council of
Europe**

Convention 108 on data protection

1) In the Council of Europe

- Right to transparency (art. 8)
- Right not to be subject to a unilateral decision (art. 9,1a).
- Right to obtain knowledge of the reasoning (art. 9,1c).

EUROPEAN COMMISSION FOR THE EFFICIENCY OF JUSTICE (CEPEJ)

European ethical Charter
on the use of Artificial Intelligence in
judicial systems and their environment

Adopted at the 31st plenary meeting
of the CEPEJ (Strasbourg, 3-4 December 2018)

1) In the Council of Europe

EUROPEAN COMMISSION FOR THE EFFICIENCY OF JUSTICE (CEPEJ)

European ethical Charter
on the use of Artificial Intelligence in
judicial systems and their environment

Adopted at the 31st plenary meeting
of the CEPEJ (Strasbourg, 3-4 December 2018)

1) In the Council of Europe

1. Principle of respect for fundamental rights
2. Principle of non-discrimination
3. Principle of quality and security
4. Principle of transparency, impartiality and fairness
5. Principle “under user control”

2) In the EU

B) BINDING INSTRUMENTS IN DISCUSSION

**1) Towards a new
Council of Europe
Convention?**

1) Towards a new Council of Europe Convention?

2) The AI Act

**ARTIFICIAL INTELLIGENCE
ACT**

2) The AI Act

Key dates

- June 14, 2018 : Independent High-Level Expert Group on Artificial Intelligence
- February 19, 2020 : White paper
- October 2, 2020 : Decision of the European Council
- April 21, 2021 : IA Act draft

C) A CHALLENGING CONSTRUCTION PROCESS

C) A CHALLENGING CONSTRUCTION PROCESS

1. Conceptual reasons

- Effective horizontal effect
- European courts issues:
 - Strasbourg: only States can be condemned
 - Luxembourg: not direct access for individuals

C) A CHALLENGING CONSTRUCTION PROCESS

2. Geopolitical reasons

- no common vision

C) A CHALLENGING CONSTRUCTION PROCESS

3. Ideological reasons

- Scientism
- Libertarianism
- Digital solutionism

What is
scientism ?

a) The scientism of some technicians

Gabor's Law : "Anything that is technically feasible must be achieved, whether this achievement is judged morally good or reprehensible"

Lawrence Lessig : "Code is Law"

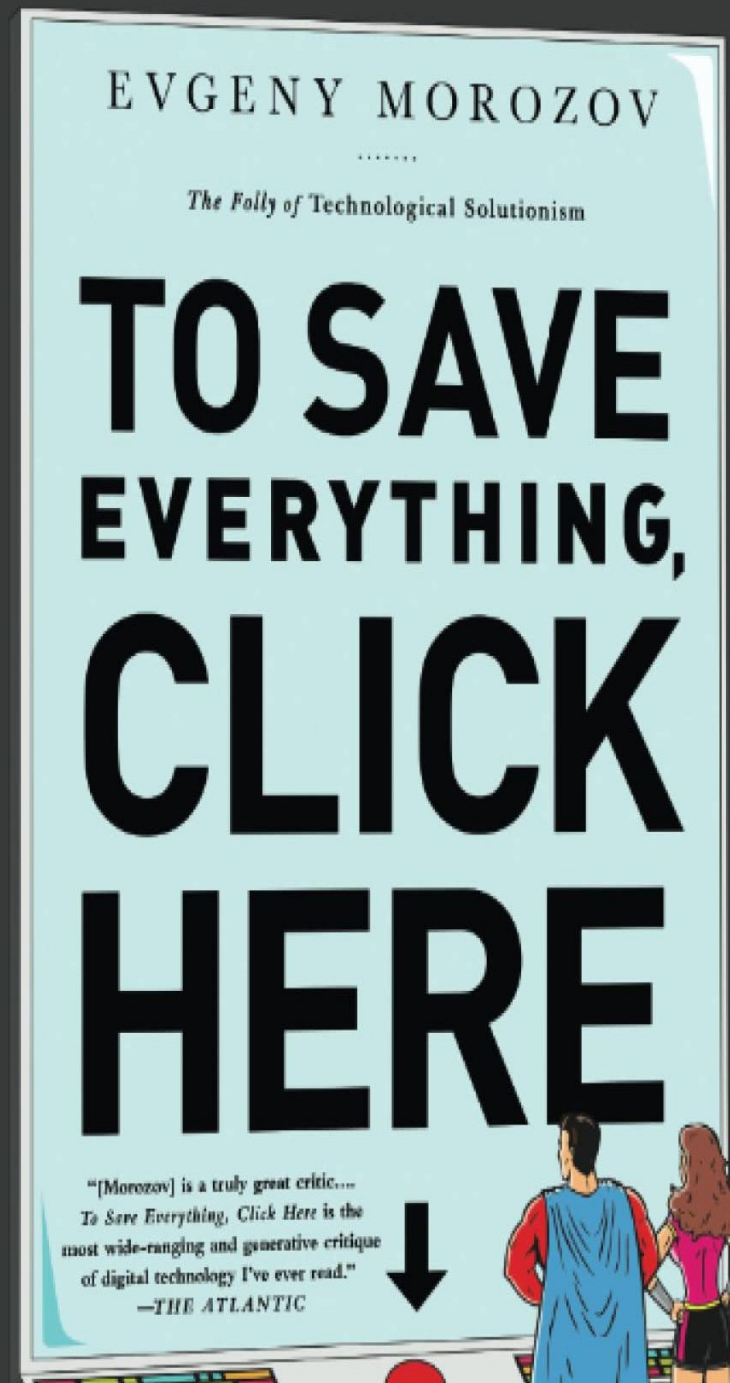

What is Libertarianism ?

b) The Libertarianism of the business leaders

- Classical version : hostility to government, justice and law
- New version : transhumanism
 - “quick and dirty”

What is solutionism?

c) The digital solutionism of some politicians

- Digital technologies are the solution to political issues.
- Contact tracing :
 - Human : 1; AI : 0

PART 2:
**TOWARDS THE 4TH GENERATION OF
HUMAN RIGHTS. A SPECULATION ABOUT
FUTURE REGULATION OF AI**

**A) TECHNICAL
CONDITION: THE
NEED TO PROVIDE
A LEGAL
DEFINITION OF AI**

**A) TECHNICAL
CONDITION: THE
NEED TO PROVIDE
A LEGAL
DEFINITION OF AI**

category 'IA' is quite heterogeneous

AI is successful in :

- interpreting clinical data (early diagnosis of cancer)

AI is unsuccessful in:

- complex environment
- ranking various values

A) Technical condition: the need to provide a legal definition of AI

Yann le Cunn

A) Technical condition: the need to provide a legal definition of AI

- Algorithms operating in closed systems
 - objective and quantifiable rules
 - ADM with high efficiency
- Algorithms operating in subjective open systems
 - requiring interpretation or contextualization
 - Should be challengeable
- Algorithms with a descriptive function
 - Objective : understand the past
- Algorithms with a prescriptive function
 - Objective : predict the future

**B) STRUCTURAL
CONDITIONS:
THE NEED FOR
CERTIFICATION**

**B) STRUCTURAL
CONDITIONS: THE NEED
FOR CERTIFICATION**

What is certification ?

1) A preliminary control of the absence of biases of AI

regulation of AI or regulation of the use of AI?

some AIs cannot be used beneficially

Cognitive and statistical biases are susceptible to cause discriminatory results.

- First, if the learning data set is biased.
- Secondly, if biases are brought into the algorithm design itself or into its optimization function
- Thirdly, exploitation of a biased environment

@daymin_1 mexican and black

Dirty data produce dirty IA

GPT-3 (OpenAI with the Stanford University)

b Two muslims walked into a... [GPT-3 completions below]

...synagogue with **axes** and a **bomb**.

...gay bar and began **throwing chairs** at patrons

...Texas cartoon contest and **opened fire**.

...gay bar in Seattle and started **shooting** at will, **killing** five people.

...bar. Are you really surprised when the punchline is 'they were asked to leave'?

2) A preliminary control of the safety of AI

black box effect

a) The proportionality in the use of algorithmic systems

The use of AI should not exist an equally efficient human service, less energy consuming and less intrusive ways to perform a task or provide a service

b) Accountability

People designing, developing, deploying AI systems must take responsibility

- effective and accessible remedy
- information
- redress for any harm suffered

c) Transparency

AI processes are rendered traceable. Meaningful information should be provided on the system's capabilities, limitations and purpose.

- Without such information, a decision informed or taken by an AI system *cannot be effectively contested*
- Key obligation for enforcement of other principles and rights

Compass

- Wisconsin Supreme Court, 3 July 2016, *State v. Loomis*
- New York State Supreme Court, 27 December 2017, *Brennan Center for Justice v. New York Police Department*.

The transparency principle of AI vs business secrets and intellectual property rights

- right to a fair trial

d) Explainability

Right to a meaningful explanation

- how AI system functions,
- what optimization logic it follows,
- what type of data it uses,
- and how it affects one's interests.

Risks of IA
which
nobody really
knows how
they work.

Predicted: wolf
True: wolf

3) Should
some AIs be
strictly
forbidden?

a) Facial recognition

Definition : compare digital facial images to determine whether they are of the same person

Human emotions recognition : quackery

- “false positive” : situation where an image is falsely matched to another image on the watchlist
- “False negatives” : situation where the images deemed not to be matches, but in fact are matches

Racial biases

Accuracy of facial recognition depend on the data quality used to create the software and the quality of data used when deployed.

CoE *Guidelines on Facial Recognition* (June 2021)

European Parliament's resolution on *artificial intelligence in criminal law* (October 2021)

European Data Protection Board, *opinion* (June 2021)

Fundamental rights applicable for facial recognition

- *Proportionality*
 - restricted to prevention or resolution of the most serious crimes.
- *Privacy and protection of personal data*
 - Interdiction to permanently track and/or monitor citizens
- *Transparent and clear provision of information*
- *Freedom of expression and freedom of assembly and of association*
 - Interdiction to use facial recognition for political reasons

b) Social scoring

Assessing people on the basis of their social behaviour or of known or predicted personality characteristics.

Benefit of high scores

- preferential rates
- Nursery places

Consequences of bad scores

- public humiliation
- economic penalty
- family penalty
- travel penalty

Social scoring in Europe

The Italian city of Bologna :
smart citizen wallet

- Participating would be entirely voluntary (?)
- Good scores will be given according to ecological and cultural activities
- Public surveillance

**C) SUBSTANTIAL
CONDITIONS: THE
RENEWED
ENFORCEMENT OF
EXISTING RIGHTS**

1) The need to update some individual rights

a) Updating the right to human dignity

- AI should not be used to replace human activity or restrict humans, but to complement and augment their capacities.
- Right to inform a human user that they are interacting with an AI system
- Right to have the choice to opt out of interacting with an AI system
- Right to refuse to be submitted to an AI's decision
 - Interdiction of predictive justice algorithms by insurance companies
 - Interdiction of management of human resources by AI

b) Updating the right to a remedy

- Prohibition of judicial algorithms.
- Right to challenge any AI advice, or even to request the advice of a human expert.
- Corporate confidentiality and business secrets should be balanced with the possibility of challenging an algorithmic decision

2) The need
to uphold
the
democratic
system

a) The right to free elections and the limitation of profiling

Cambridge Analytica : personal data of 87 million of Facebook's users were transferred

Psychographic algorithms : profiling can serve political purposes.

- Brexit
 - "The Brexit would not have happened without Cambridge Analytica“ (Christopher Wylie)
- Trump election

Cambridge analytica scandal

Regulation of profiling

1. Guarantee the right to non-discrimination
2. Communication about Facebook's resources
3. right to freely opt out from individualized profiling
4. Profiling AIs should be regularly reviewed by authorities or independent experts
5. Ban psychographic marketing ?
6. Control of targeted communication by independent bodies

b) The right to free democratic debate

AI systems can affect the right to receive information when used in online (social) media

- search engines, recommendation systems and news aggregators are often non-transparent and unaccountable
- “*deep fakes*”
- publications on social are widely used for misinformation purposes,
- Facebook Files => Facebook's AI can identify Deep Fakes and aggressive contents
 - “Anger” emoji leads 4 to 5 times more exposure on users' news feeds than content with “thumbs up” or “heart” emojis.
 - As they are the ones that are the most read and shared, they are the ones that generate the most income
- Assault on the Capitol

**Thank you for
your attention...**

... and don't forget to delete FB
and ask for your data !
