HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

SEMANTIC AND SYNTACTIC PREDICTIONS IN READING ALOUD: ARE GOOD PREDICTORS GOOD STATISTICAL LEARNERS?

Elisa Gavard & Johannes C. Ziegler

BACKGROUND

Fluent and skilled reading involves the ability to predict upcoming words using semantic and syntactic information (Chang et al., 2016; Ferreira & Qiu, 2021; Pickering & Garrod; Staub, 2015).

A growing number of studies have used statistical learning (SL) paradigms to investigate whether SL abilities can explain inter-individual differences in reading abilities (Ren et al., 2023).

RESEARCH QUESTION

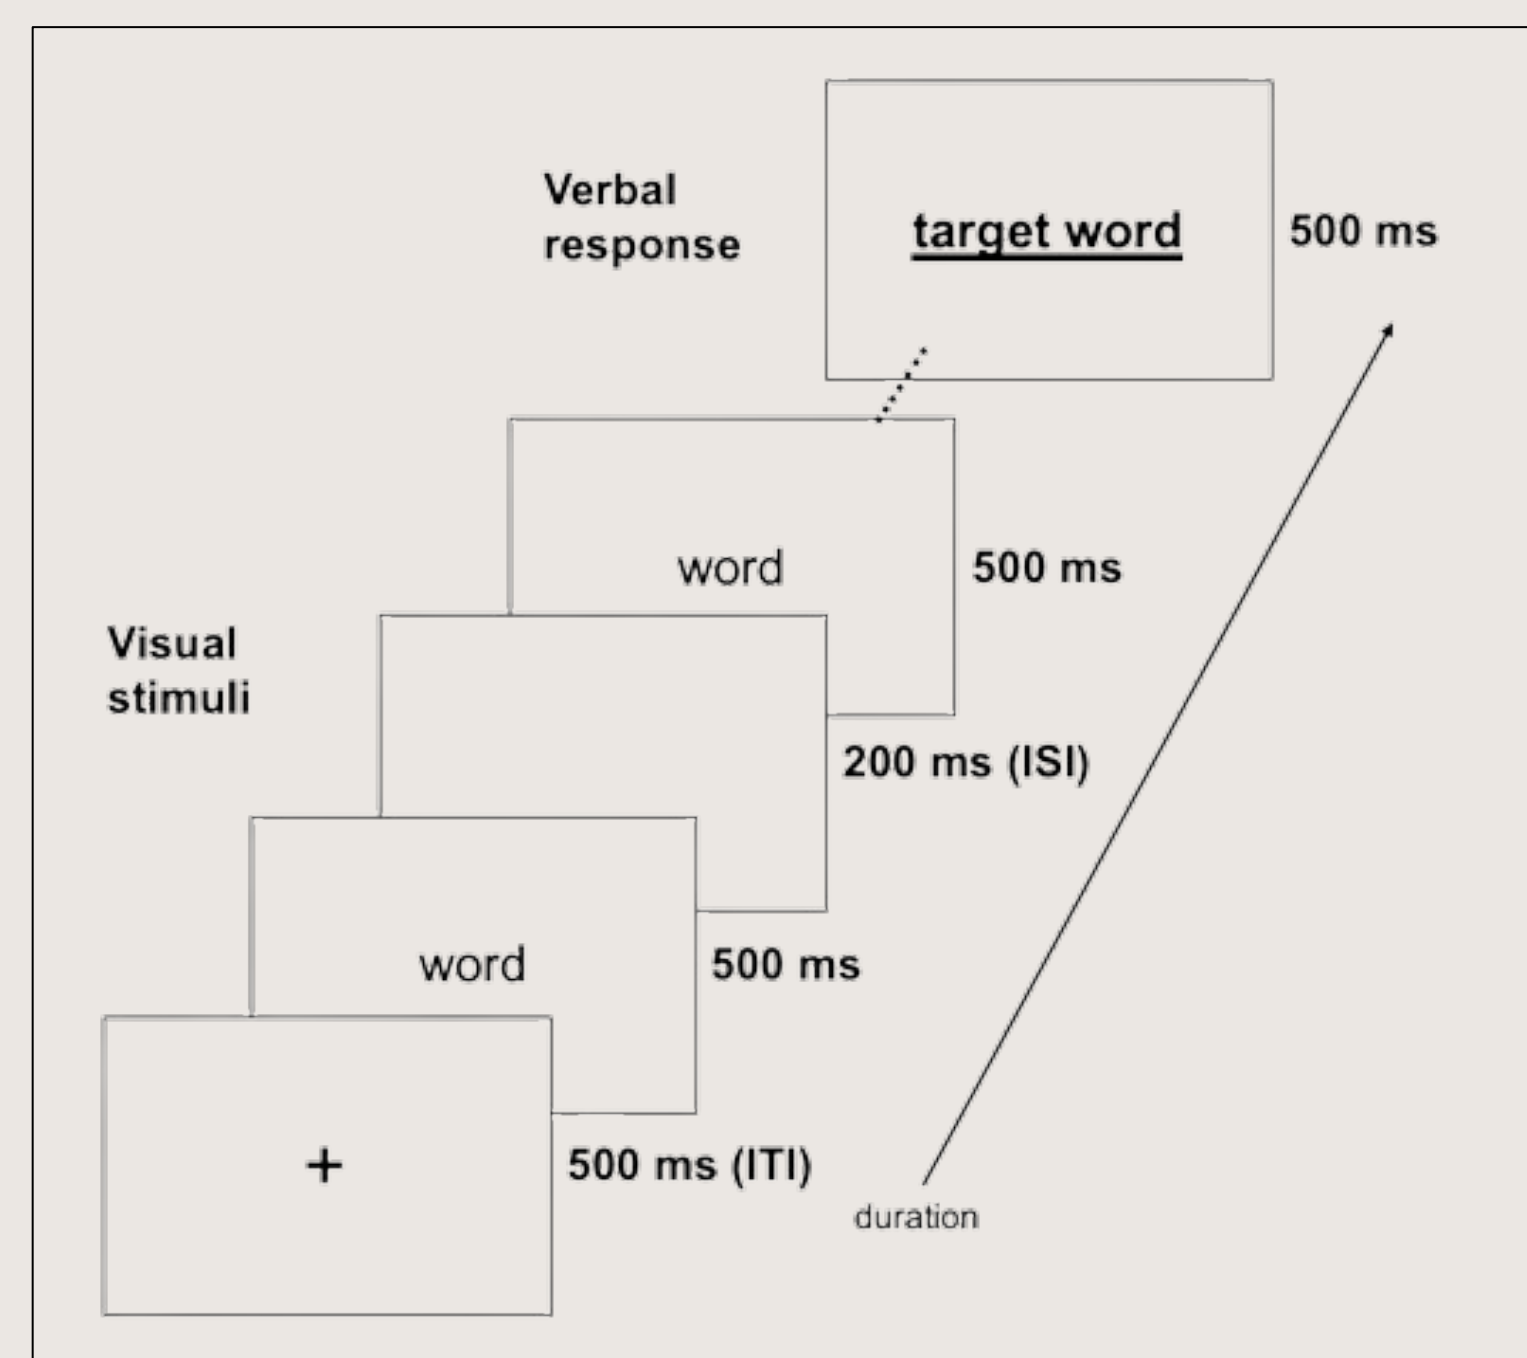

Does the ability to make predictions in the domain of language rely on the domain-general ability to extract statistical regularities, i.e., SL?

120 normo-readers students

METHODS

Predictive reading task

Gavard & Ziegler (2022). *Experimental Psychology*.

Serial reaction time task

Visual & Auditory SL task (VSL & ASL)

VSL: Siegelman et al. (2017). *Behav Res*.
ASL: Siegelman et al. (2018). *Cognition*.

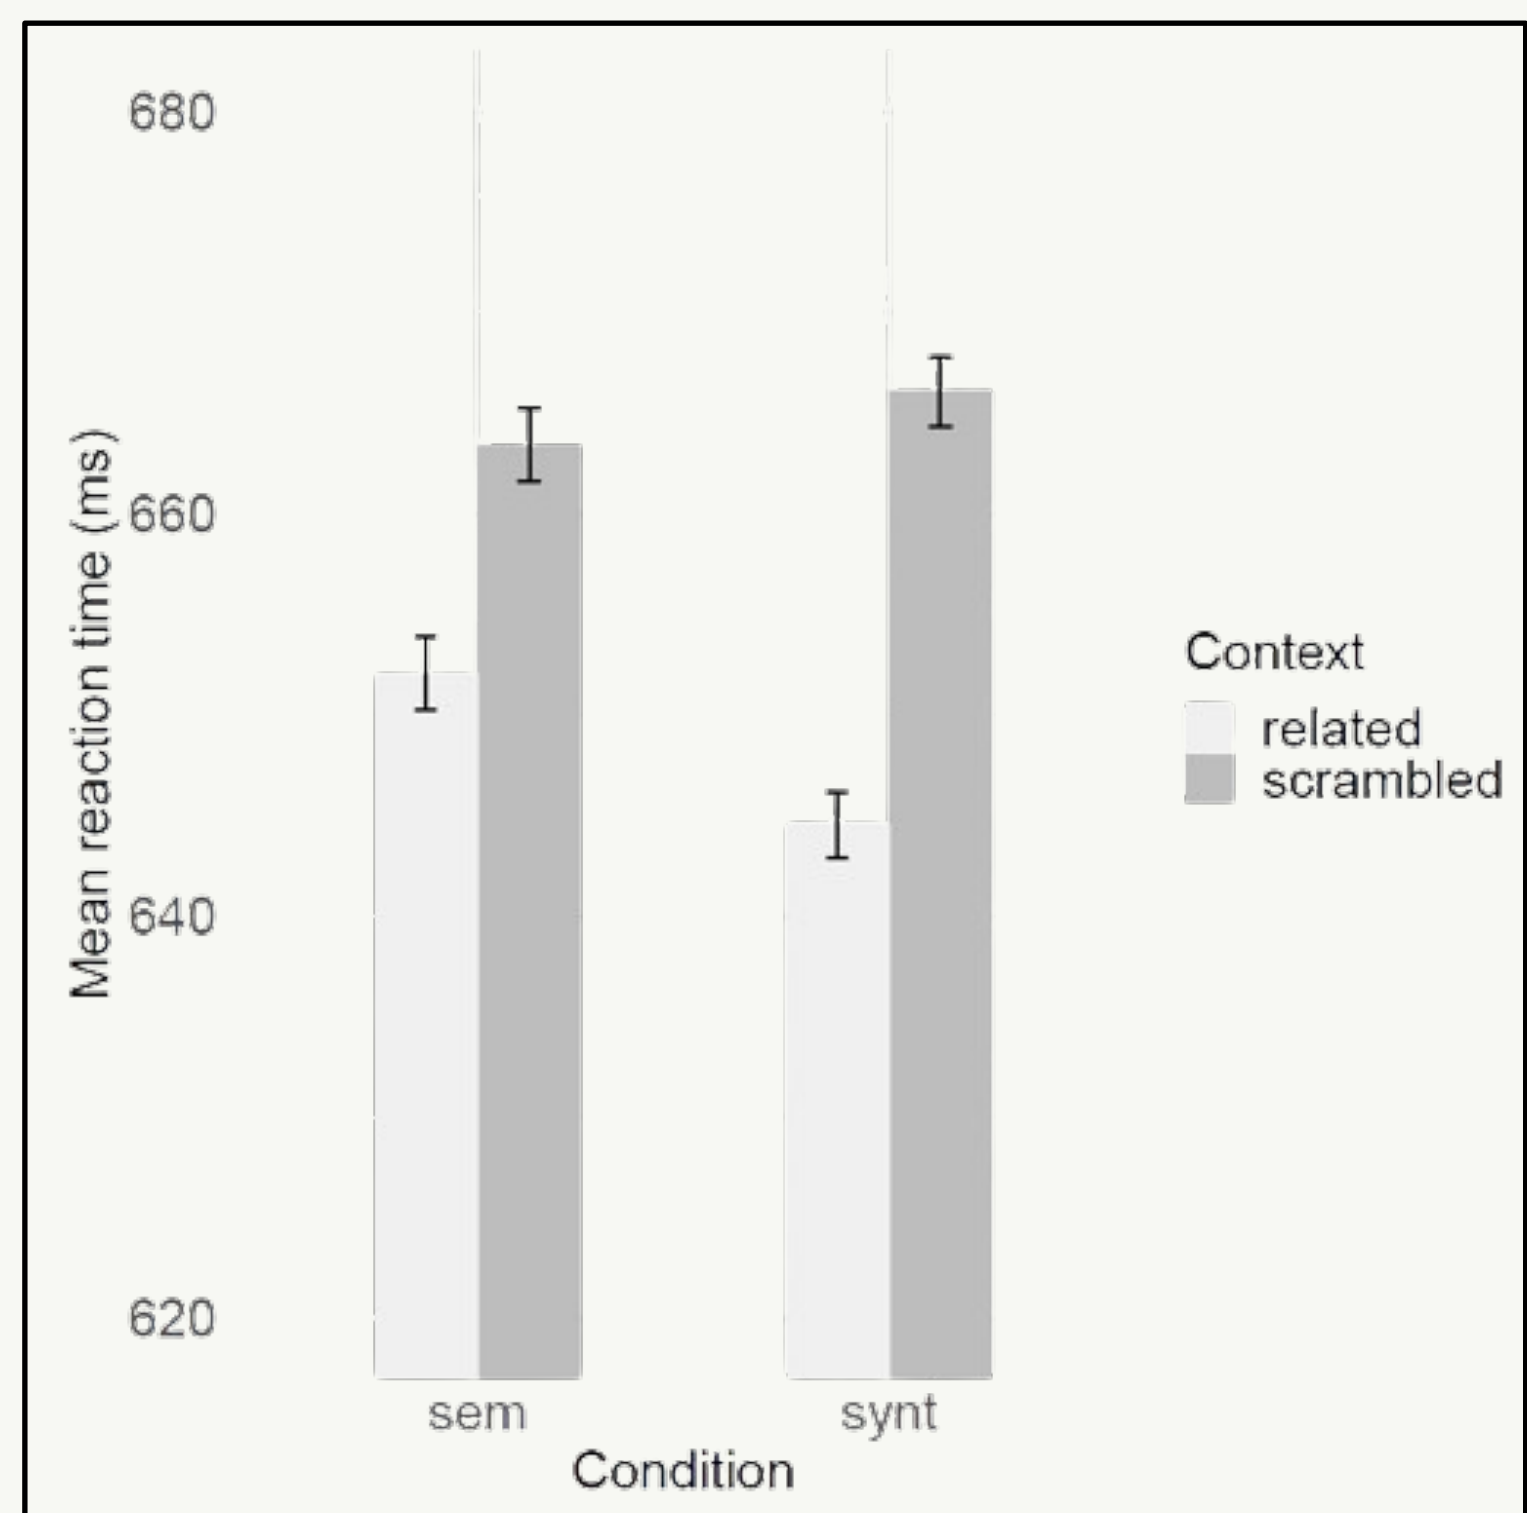

Reading level task: SLS-Berlin

- 77 sentences
- « The cello is an animal belonging to the category of birds » : Correct or incorrect ?

Lüdtke et al. (2019). *Frontiers in Psychology*.

RESULTS 1/2

Predictive reading task

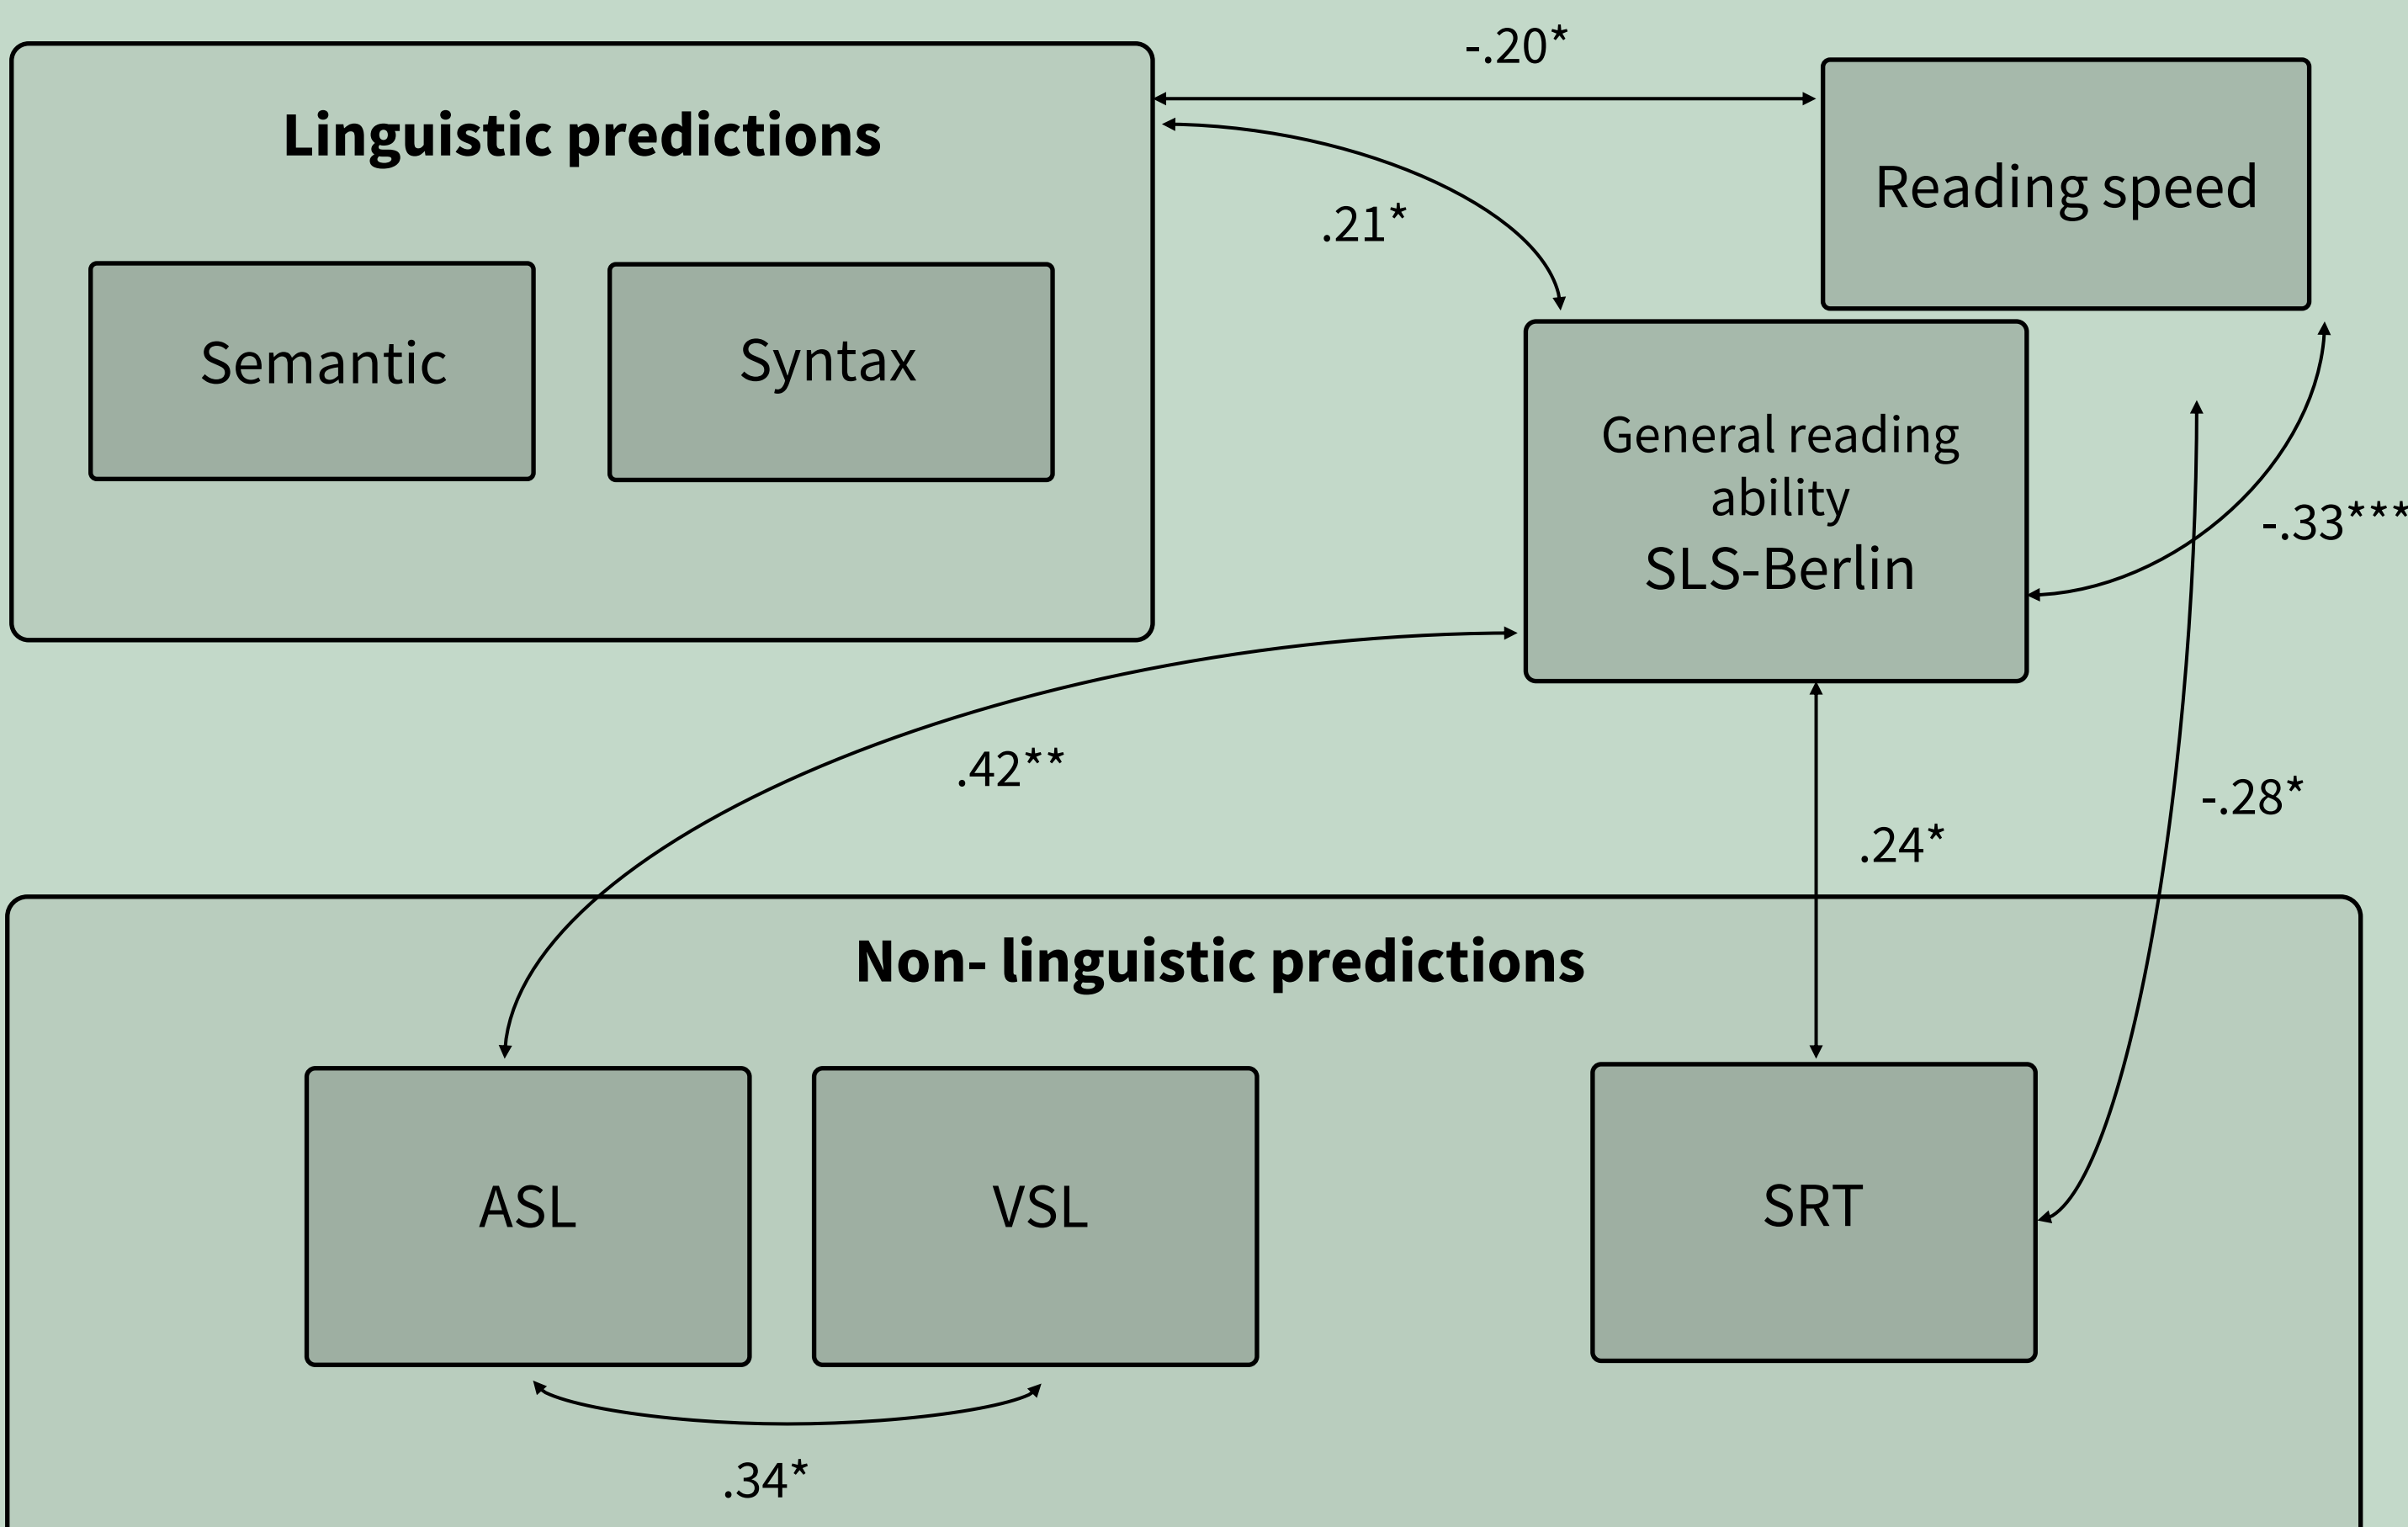

Serial reaction time task

Visual & Auditory SL task (VSL & ASL)

RESULTS 2/2

Significant Pearson correlations are marked by asterisks: * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$ (FDR-corrected).

TAKE HOME MESSAGE

- 1 We found strong semantic and syntactic context effects on reading aloud single words.
- 2 SL was not associated with the ability to make semantic and syntactic predictions.
- 3 SL was associated with general reading ability and reading speed.
- 4 SL is not a unified construct.
- 5 ? The link between predictive reading, SL and dyslexia remains an open question.

ACKNOWLEDGEMENTS

This research has been supported by grants from France 2023 (ILCB, AN-16-CONV-0002; EFRAN, ANR-22-FRAN-0004), the Excellence Initiative of Aix-Marseille University A*MIDEX (ANR-11-IDEX-0001-02), and the center of excellence on research in education and teacher training (AMPIRIC).
