HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L’archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Corrigendum

Corrigendum to “Development of New Tools to Detect Colistin-Resistance among Enterobacteriaceae Strains”

In the article titled “Development of New Tools to Detect Colistin-Resistance among Enterobacteriaceae Strains” [1], there was an error in the text of the Selective Culture Media section, where the sentence “The chromogenic and non-selective CHROMagar Orientation medium (Biomérieux, Marcy l’Étoile, France) was also used with 4 mg/ml of colistin” should be corrected to “The chromogenic and nonselective CHROMagar™ Orientation Medium (CHROMagar, Paris, France) was also used with 4 mg/ml of colistin.”
